

Harney ESD

March 2018

Successful Grant Writing

Harney ESD has captured 2 grants for Slater Elementary School! The Northwest Health Foundation approved the Oregon Active Schools grant written by the School Improvement Department at Harney ESD. A second grant was awarded from HOPSports Brain Breaks too this past month as written by HESD and requested by Slater Elementary Principal Hobgood. Grant writing is a service provided in the local service plan for all component schools. Above are students from Henry L. Slater Elementary and P.E. teacher Alice Herauf receiving the check from Harney ESD employees Cori Wright and Hollie Held for \$1500. Over the last 4 years, Harney ESD has written grants totalling over \$950,000 for Harney schools.

Tech Tips!

Check out the snipping tool!

Capture screenshots with the snipping tool...it's such an easy way to capture part of your screen. You can save the snip as a picture, email technology support with an actual picture of an error message, or use it in any variety of ways. It's so simple and easy to use, and it's part of your Windows software.

Technology Amplifying Student Voices

We are preparing for an epic month of professional learning that includes some big names in the student learning and technology world that include the likes of Jeff Utecht, Matt Vaudrey, Michael Matera, John Stevens, Rachel Medeiros, and much much more. April 6th Rachel Medeiros is at Harney ESD amplifying our writing practices! Having seen Rachel present on multiple occasions, Harney County is in for a treat in best practices in writing instruction that will build on the countywide movement of Step up to Writing, engagement and instructional technology in the classroom.

@hedipaullus Instructional Coach

John Stevens

@jstevens009 Author, EdTechCoach, teacher, designer, #CAedchat

Matt Vaudrey

@Mr. Vaudrey Google Certified Innovator, EdTech Coach and author.

Joe Buglione

@h2odrifter Instructional Coach

Tim Welch

@redtailfan IT Director, Google certified trainer, designer

Eric Nichols

@IamEricNichols Director of School Improvement & Technology, Student & Teacher Voice advocate

COMING SOON!

Professional Development

Continuing with the Harney District 3 professional development plan, Harney ESD is assisting in scheduling and organizing as developed in collaboration with the Harney School District #3 administration (including the entire administrative team!), Harney #3 teachers and students as pictured, Student and Teacher Voice surveys (taking place this week and next), model lessons, and focus groups are taking place so as to continue the movement of voices in education.

Student focus groups and student observation groups have taken place at HMS and are being scheduled at both Slater and BHS currently to assist in understanding the student and teacher voice data being collected by Harney 3.

HESD continues to hold Harney Administrative team meetings, most recently at Hines Middle School, to collaborate with the Harney administrators at HESD, Harney 3 and Harney 4/UH1J.

These collaborative meetings have involved budgetary conversations, professional development, etc. In addition to these meetings, HESD continues to support local districts with the writing/consultation of their federal programs as is the case for District 3/District 4 where the Title 1A and Title 2A and carry over programs had consultation provided by HESD staff.

Lunch with a Tech

HMS Apr. 3, BHS Mar. 13; Slater Mar. 20

State testing season is upon us and HESD continues to offer state assessment support for all Harney County/Lake County and Grant County Schools. In addition, we continue to offer easyCBM and easyCBM support for Harney County rural schools along with RTI support for our RTI grant consortium here in Harney County. RTI support comes to those who signed on to the RTI grant that Harney ESD wrote just 2 short years ago!

Beginning in April, Harney ESD/Eastern Oregon Technology will no longer be supplying wireless internet to Harney County. Internet will still be provided and support given to our schools that are wired. Districts will continue to receive network services and desktop services for those who have contracted for this.

A mastery approach to teaching and learning mathematics

Harney ESD will be supporting the work of mathematician and STEM specialist Brad Fulton at Hines Middle School this upcoming April and all teachers are invited for an eventful day of model lessons that engage students and invite learning. This builds on the previous visit this Winter and follow-up by Crane teachers with the Math to Mastery training.

HESD Learning Resource Center
After a long conversion process to the Sage Library System, organized by the Harney County Library, the library at Harney ESD is once again ready for the teachers to use!
